The EMMA team will take you through the process of setting up and delivering a Massive Open Online Course (MOOC) from initial concept through to evaluation. Practical information about how the EMMA platform operates will be provided as well as tips and suggestions as to how to get the most out of the available functionalities.

This summer school will also provide training and support on using the translation and transcription services available on EMMA.

Organisational aspects to do with licensing, IPR and the management of the MOOC when made available on EMMA will also be addressed as part of the week-long programme.

The EMMA Summer School will be held alongside the annual JTEL Summer School organised by The European Association for Technology Enhanced Learning (EATEL) in collaboration with Federica Web Learning (UNINA).
